

NTU Publications Policy

Guidance for compliance with open access requirements: journal articles and conference papers published with an ISSN
Follow these steps to ensure eligibility for REF submission

Green open access - deposit the accepted and final peer-reviewed text in [IRep](#), observing copyright and embargo permissions.

On acceptance

Author deposits the full-text in [IRep](#) via [PubSub](#) and provides:

- DOI
- Date of acceptance;
- Embargo details;
- Available bibliographic details.

Act as soon as possible and no later than 3 months after acceptance.

Library processes the submission within **5 working days** and the item appears in [IRep](#) as a closed deposit.

On publication

Author updates the record via [PubSub](#) and provides the date of publication and full bibliographic details. Act as soon as possible and no later than 1 month after publication.

Library processes the submission within **5 working days**, sets the embargo end date, if applicable, and includes any other statements required by the publisher.

Did you know?

NTU has a fund to support **gold** open access which allows immediate deposit of the final version on publication upon payment of an article processing charge. If the **green** (free) open access option doesn't meet your needs, you can make a case for **gold** open access. Your target journal may not have a **green** option, or the length of embargo may exceed the maximum permitted for REF2021 compliance.

A [completed open access fund form](#), signed by the relevant ADR, is required. [Guidelines for applying for this fund](#) are available.

Help and Support

Check [Sherpa Romeo](#) for copyright and embargo permissions.

Your [Research Support Librarian](#) is available or help and advice during each stage of the process.
