

The Green Zone – help keep Clifton campus green

One of our commitments as a green university is to create world-class campuses full of green buildings and green spaces.

In keeping with this commitment we have recently created a new heart for Clifton campus featuring two brand new state-of-the-art energy efficient buildings. These are surrounded by beautiful outdoor spaces with attractive plants and seating for students, staff and visitors to enjoy.

To keep these buildings and spaces looking their best we have introduced a Green Zone on campus.

The Green Zone is an area which is free from:

- unauthorised vehicles;
- smoking, including the use of electronic cigarettes;
- cycle parking;
- litter; and
- the dropping of chewing gum.

We have created a map overleaf which marks the Green Zone and includes designated areas where you can smoke and park your bicycle at Clifton campus.
