

Trent Institute for Learning and Teaching

TILT Personalisation Workshop, Wednesday 14 September 2016

Venue: Newton Level 0, LT8 and LT9, City Campus

Workshop Convenor: Lisa Clughen

You are invited to attend an event planned to support tutors in the personalisation of tutorials. This is an opportunity to learn from professionals about techniques and tools to use in the support of students to facilitate delivery of personalised tutorials as a component of curriculum refresh (action ACT301).

The event considers key issues involved in providing personalised support to help students with the academic side of their studies. This involves both the pastoral and the academic skills required for disciplinary study. People who work in a personalised service will draw on their own professional training to provide academic tutors with practical advice on key issues involved in personalisation. We have speakers from the following professions: university academic support services; counselling and mental health; educational development; social work; and personal training for sports and fitness. The event is suitable for all tutors, especially course leaders and personal tutors.

Time	Session	Speakers	Venue
09.10	Registration		Newton level 0
09.40	Opening of event	Lisa Clughen	Newton LT9
09.50	Personalising the student experience	Julia Davies	Newton LT9
