1. Remit of policy

The University has procedures for admission that are designed to be fair, clear and explicit; and defined roles and responsibilities to ensure they are implemented consistently and monitored routinely.

1.1 This policy covers the recruitment, selection and admission to all courses delivered by the University.

Explanatory note

- For specific detailed guidance relating to the application process for taught courses at undergraduate and postgraduate level please see Quality Handbook (QH) Supplement 13A, for research degrees please see QH Supplement 13B and for further education courses please see QH Supplement 13C.

1.2 Prospective students attending institutions delivering NTU courses will normally be subject to the relevant recruitment, selection and admissions policies of those institutions. However, it is expected all institutions responsible for the delivery of NTU courses will adhere to relevant Professional, Statutory, and Regulatory Body (PSRB) requirements and to the principles of good practice for fair and transparent admissions as outlined in this policy.

Explanatory note

- All collaborative courses are subject to approval and review processes, annual monitoring and verifier or School-based course coordinator visits which cover recruitment, selection and admission policies.

1.3 The policy requires compliance with relevant legislation and associated NTU policies, including but not limited to Equality policy & legislation, Home Office UK Visa & Immigration (UKVI) regulations and legislation for international students, Fee Assessment Regulations, the Data Protection legislation, Rehabilitation of Offenders Act and Disclosure and Barring Service (DBS) regulations and legislation.

1.4 Where applicable sectorial best practice guidance, as exampled below, has been incorporated into this policy and is adhered to in the daily operation of the Admissions Policy unless otherwise stated.

- UK Quality Code for Higher Education (Chapter B2 Recruitment, Selection and Admissions to HE).
- UK Quality Code for Higher Education (Chapter B11 Research Degrees).
2. Contextual statement

**Fair and transparent processes**

2.1 The University’s application processes are designed to promote transparency and consistency. They provide equal consideration for all prospective students who apply by the relevant closing date (if applicable) or apply in good time to complete all admissions processes and meet any relevant external regulatory requirements (including visa requirements) before the start of their course.

2.2 The University ensures all promotional materials are accurate, relevant, current, and accessible in order to provide information that will enable prospective students to make informed decisions about their options. On occasion, it is necessary to amend course titles, content or entry criteria after the details have been published and in these circumstances the University will take reasonable steps to ensure the changes are communicated to relevant stakeholders.

2.3 All courses have a comprehensive course profile on the University’s website, and where applicable a UCAS Entry Profile, detailing the qualifications, subject knowledge, qualities and skills required for the course along with the details of any non-academic (pre-enrolment) requirements such as the Disclosure and Barring Service (DBS) checks.

2.4 All courses are required to secure a good match between the abilities and aptitudes of the potential student and the demands of the course, thus leading to the selection of prospective students who can reasonably be expected to complete their studies.

**Widening participation**

2.5 The University is committed to developing confident and ambitious graduates equipped to shape society, whatever their background. The University encourages applications from those who have the ability to benefit from the course of study by achieving the standards required for the award.

2.6 As part of the University’s commitment to widening participation and ensuring fair access, courses encourage applications from a wide range of backgrounds, experience and achievements, and are committed to developing an inclusive community.
Contextual data

2.7 The University is provided with contextual information to supplement its UCAS data set. The University does not use contextual data to inform the individual offers for applicants.

2.8 As advocated as good practice by Supporting Professionalism in Admissions (SPA) the University undertakes in-depth analysis of data relating to its applicant trends and establishes statistical relationships between prior attainment and subsequent achievement of NTU's widening participation and equality groups. As an institution, NTU recruits a diverse student body and proactively uses contextual data for targeting its outreach and retention initiatives. However, informed by the evidence, NTU does not use contextual data within its admissions procedures.

Explanatory note
- Further information can be found the University’s Access Agreement.

3. Criteria for admissions

3.1 A prospective student may be admitted to an NTU course on the basis of evidence to suggest that he/she will be capable of achieving the intended learning outcomes of the course and/or competence in standards required for the award.

3.2 Entry requirements are set for each taught course by the School responsible for delivery, and will state the basis on which a prospective student will be admitted to the course, by:
   a. listing the specific requirements of all relevant entry qualifications, including number and level of awards, minimum grades or points and any essential subjects;
   b. stating whether additional qualifications, experience, skills or competencies are required;
   c. ensuring that basic admissions requirements for each course are publicised in the prospectus and on the University web site.

Explanatory note
- For Research Degrees, the entry requirements are set within QH Section 11: Research Degrees.

3.3 Prospective students may also be expected to meet other specific requirements in order to be eligible to take up a place. The University retains the right to limit the number of places available on its courses of study.

3.4 Admissions Officers can consider a wide range of factors when assessing applications including:
   a. Examination grades;
   b. Skills and experience;
   c. Personal statements;
d. References.

Explanatory note

- With the exception of UCAS/UTT courses a reference is only required by exception for some courses, prospective students should refer to the course profile on the website to check for this requirement. A reference is required for all NTU research degrees.

e. Non-standard entry qualifications, such as vocational qualifications;

f. Industrial/professional experience;

g. Research proposals (in the case of research degrees);

h. Performance at interview;

i. Submitted work.

3.5 Entry requirements for all courses can be found on the NTU website on the applying tab of the course profiles.

3.6 Entry Criteria for all courses are reviewed annually under the University’s Entry Criteria Review Process which reviews the operation of the requirements in the previous cycle and any new PSRB requirements.

3.7 For UCAS prospective students, offer strategies will be applied equally to prospective students applying through the same entry route (e.g. main cycle, Extra, Adjustment, Clearing). However, different strategies may be used by entry route to enable the University to manage its numbers.

Explanatory note

- For example, during the main application cycle (deadline of 15 January) the University may require applicants to achieve grades BBC (112 UCAS tariff points) for a particular course and all applicants before the deadline will be given equal consideration against this same strategy. If following 15 January the numbers on a course are limited the University may increase its offer strategy to grades BBB (120 UCAS tariff points) in order to help manage its numbers.

4. Responsibility for admissions

4.1 The University ensures that the roles of key participants in the admissions process are clearly stated and understood.

4.2 The Director of Marketing and Communications has overall responsibility for the development, operation and monitoring of the University’s Admissions Policy. The Admissions Team or admitting school (and the Doctorial School for admission to
research degrees) is responsible for its implementation. These operational responsibilities include:

a. oversight and review of the admissions process across the University to ensure that it continues to support the mission statement and strategic objectives of the University and remains current and valid in light of the changing external environment;

b. reviewing the decision-making process and assessment methods (for example the development and use of admissions tests, the use of interviews) to ensure they continue to comply with University guidelines and sector best practice;

c. ensuring that admissions staff are trained and receive appropriate staff development (both Admissions Officers and School-based) involved in the admissions decision-making process;

d. monitoring the implementation of the policy and instituting change where needed.

4.3 The Admissions Team, working in coordination with Academic Registry, Academic Schools, the Doctoral School, Marketing teams, NTU Global and the International Development Office (IDO), are responsible for policy implementation and specifically for:

a. coordinating the assessment of all applications and ensuring that all those involved in this process are informed of the policy and procedures of the University, School and course team;

b. making arrangements for assessing the suitability of prospective students and liaising with Schools to arrange interviewing where necessary;

c. allocating conditional and unconditional offers and communicating these to prospective students via appropriate methods, and ensuring that prospective students are aware of the obligations placed on prospective students at the time of the offer;

d. ensuring that successful prospective students receive information on acceptance procedures;

e. keeping records confidential;

f. liaising with the Deans of School, Course Leaders and course teams (or, in the case of research degrees, the Head of the Doctoral School, School Postgraduate Research Tutors, Professional Doctorate Course Leaders, and the University and College Research Degrees Committees) during the admissions cycle, and drawing their attention to any developing trends in applications;

g. liaising with admissions tutors and University staff involved in the admissions process to ensure that the admissions process is applied consistently throughout the University;

h. ensuring that relevant legislative frameworks are complied with in respect to admissions and PSRBs;

i. identifying prospective students requiring fee assessment to determine the appropriate fee level of either UK/EU or international fee rates;
j. to ensure that prospective students declaring criminal convictions are assessed on their academic suitability before being dealt with under the University’s policy and process for self-declared criminal convictions;

k. providing general advice and guidance for admission to courses and referring queries to the relevant School as necessary;

l. following up non-responses to offers and offers of acceptance.

4.4 The NTU Outreach Team and Office for Fair Access (OFFA) Monitoring Group are responsible for liaising and coordinating with external schools, colleges and academies as part of the University’s widening participation and recruitment strategies. The Outreach Team delivers an extensive programme of activities designed to help young people access and succeed at university.

4.5 The NTU Outreach Team, along with the Success For All group and OFFA Monitoring Group are responsible for using, analysing and interpreting relevant data and statistics on applications, offers and acceptances to ensure that the Admissions Policy is being applied fairly and consistently within the University.

4.6 Schools liaise with the Admissions Team (or the Doctoral School in the case of research degrees) to ensure the policy is implemented consistently across the University, and specifically for:

a. monitoring, analysing and reporting applications and enrolment data to ensure compliance with the University's Equality and Diversity Policy;

b. developing and making available the School’s policy on feedback to unsuccessful candidates;

c. making assessment criteria explicit when using portfolios, admission tests, interviews and/or essays or other forms of assessment as part of the admissions process;

d. making explicit how selection decisions are made when applications have comparable qualifications but numbers of places are limited;

e. providing feedback to prospective students on APL outcome decisions;

Explanatory note

- The University is committed to providing unsuccessful applicants with useful feedback on their application. All applicants will normally receive a brief reason for their declined decision at the point of decision. However, it is appropriate for Schools to vary their more detailed feedback arrangements dependent on the course, its form of application process and the volume of applications, e.g. the feedback may be ‘on demand’ or limited in terms of UCAS applications, but routinely provided in more detail for specialised postgraduate courses. Feedback will only be provided to third parties with the explicit permission of the prospective student.
f. informing the Admission Team (or Doctoral School in the case of research degrees) of any significant changes to a course after offer of a place and before enrolment is competed, so that students can be advised of the options available to them in the circumstances.

4.7 Schools determine the kinds of evidence appropriate for each course; such evidence may take the form of educational qualifications, APL, appropriate personal qualities, enthusiasm for the subject, or a combination of any of these. In order to ensure the selection procedures are fair and implemented consistently, Schools must give careful consideration to the reliability, relevance and validity of the methods used to gather evidence about a prospective student’s merit and potential to succeed.

5. Application processing: information, advice and guidance

Accessible formats

5.1 The University makes information available in a range of accessible formats.

Prospective student enquiries

5.2 The University has central points of contact for all admissions enquiries regarding taught courses, research degrees, further education and apprenticeship courses to ensure consistency in its advice and guidance to prospective students. The University regularly reviews the content of its online virtual advisor to ensure that information is relevant and up to date. It should be noted that advice and guidance is only accurate at the point given, and whilst the University endeavours to ‘future proof’ advice this is not always possible and PSRBs requirements will always take precedence.

Prospective student events

5.3 The University offers several opportunities throughout the application cycle for prospective students to visit the University. These events are designed to enable a range of students (along with their support networks including parents, guardians, teachers and friends) to make informed decisions about the best course for them. Additional information on the student experience at NTU, including information on residential life, practical issues and individual support is also provided to inform prospective student choice.

5.4 The Admissions Team or Doctoral School are present at relevant Open Days and prospective student events to offer advice and guidance to applicants and other NTU staff. Where appropriate, the Admissions Team prepare briefing sheets for staff especially when significant changes are due (e.g. changes to qualifications, new qualifications coming on stream, regulatory changes etc.) ahead of such events to ensure consistency of message.

Up-to-date information

5.5 The University recognises that prospective students require information, advice and guidance in a range of different formats. The University endeavours, and takes all reasonable steps, to ensure that printed information is as up-to-date as possible. However, applicants should look to the University’s website for the latest course information including full details of course entry requirements.
5.6 The University is committed to ensuring that information on external websites is kept as up to date as possible but cannot be held responsible for information provided by third parties without the explicit consent of the University.

**Unforeseen circumstances**

5.7 In the exceptional circumstances that changes are made to a course during the cycle, the School Management Team in conjunction with the Admissions Team (or with the Doctoral School and where relevant the appropriate College Research Degrees Committee or Professional Doctorate course committee in the case of research degrees) will ensure that all prospective students are informed at the earliest opportunity of any significant changes to a course made between the time of the offer and completion of the enrolment process, and that they are advised of the options available to them in the circumstances.

5.8 On occasion it may be necessary to withdraw completely a course of study as the University deems it is no longer viable to offer that particular course. The University will contact prospective students at the earliest opportunity and where possible offer alternative options within NTU or with other providers if necessary.

**6. Application processing: general**

**Accelerated learning**

6.1 The University recognises that some prospective students may have taken some qualifications, for example one or more GCSEs, Scottish Highers, AS levels or A-levels earlier in the educational cycle than the norm. Applications are welcomed from these applicants and the University will assess their applications on a case by case basis.

**Accreditation of Prior Learning (APL)**

6.2 Accreditation of Prior Learning (APL) can be either Certificated (APCL), where learning has been assessed and has led to academic credits, or Experiential, (APEL) whereby learning has been achieved outside education or training systems. Recognition of APCL and/or APEL may lead to credits that can be counted towards the completion of a course and the award(s) associated with it – i.e. admission with advanced standing.

6.3 The normal maximum credit limit for advanced standing with APL is two thirds of the total credits required for the course award. In applying this principle, Schools will advise prospective students or students of the implications for their progression, the conferment of interim awards and the classification or grading of final awards.

**Admission to particular awards**

6.4 In establishing equivalence, admissions staff will normally be guided by the published UCAS tariff or the most relevant Government qualification framework.

6.5 The University accepts all equivalent qualifications, unless there are external regulatory conditions which take precedence, providing they are at the appropriate level of study according to the latest Government framework e.g. Level 2, Level 3 etc. Exceptions are made when the nature of the course applied for requires a breadth and depth of subject knowledge which may not be achieved from an
equivalent level qualification which is not of an equivalent size in terms of content and guided learning hours.

6.6 After considerable research, the University has reviewed the tariff points awarded to the International Baccalaureate Diploma by the UCAS Tariff Scheme and applies its own equivalence. Prospective students may also be required to meet specific scores for one or more of the six courses of the Diploma to meet the grade requirements for compulsory subject(s) stated for their chosen course.

Application processing times

6.7 The processing time for applications will vary according to the course admissions processes as outlined on the NTU website course profiles. At certain points in the academic cycle the volume of applications received will impact the expected processing times outlined below and the University will make all reasonable efforts to keep prospective students informed.

6.8 On average UCAS applications, not requiring an interview, work submission or further information, will be processed in 5 to 10 working days. Please note the University is closed between Christmas and New Year.

6.9 UCAS or UTT prospective students, subject to interview, work or further information requests, can normally expect to receive a decision in 20 – 40 working days.

6.10 Applicants applying for postgraduate, professional or part-time courses are normally processed in 5 – 10 working days, although this can also be affected by the nature of the admissions process and the quality of the information received.

6.11 Applications for courses involving a course of research leading to PhD, MPhil or professional doctorate can involve assessment by multiple tutors across more than one Academic School. Prospective students will be kept informed of the progress of their application on a fortnightly basis following acknowledgement of receipt.

Applying or requesting deferred entry

6.12 The University welcomes deferred applications from prospective students, either as part of their initial application or after acceptance, who wish to undertake a 'year out' before commencing their studies. Any fees payable or terms and conditions of offer are as of the year of entry and not the year of application.

6.13 Prospective students requesting deferral after they have accepted a place will need to put their request in writing to the Admissions Team or, for research degree applications, to the Doctoral School.

6.14 Deferred applications will be treated equally up until the point of confirmation. However, it may not be possible to allow a prospective student to defer based on the confirmation strategy in the year of application i.e. the entry requirements for the course may be changing in a future year.

6.15 Prospective students may only defer on one occasion (for courses with multiple start dates the deferral policy covers one calendar year, and includes research degrees). If the admission entry requirements change for a course once a prospective student has already been allocated a deferred place, the admission entry requirements at the time of acceptance will apply providing they still meet any PSRB requirements.
6.16 If a prospective student still wishes to undertake the course after a deferral period has lapsed, a new application will need to be made and they will be assessed against the entry criteria at the time of the new application.

6.17 A prospective student will not normally be granted permission to defer if the University has already published its entry criteria for the following cycle at a higher level or if the applicant have been admitted with qualifications lower than the standard entry criteria (e.g. at confirmation or clearing).

6.18 The UCAS Clearing process is for prospective students looking for spaces in the year of application. Prospective students applying through clearing will only be granted deferred places in exceptional circumstances.

Decision errors

6.19 The University is committed to ensuring high quality decision making but accepts that on occasion it may accept or reject a prospective student in error.

6.20 Where the University rejects a prospective student (who has in fact met the conditions as laid down in their offer), it will work with the affected prospective student to rectify its mistake and to minimize any inconvenience. The Admissions Office (or for research degrees the Doctoral School and relevant academic School) will liaise with the other departments, including but not limited to Student Accommodation Services, to minimize the impact of any errors.

6.21 It will be at the discretion of the University whether applicants rejected, based on information provided by them on their original application form, are reinstated following the receipt of any additional information. Any offers will be subject to the availability of places.

6.22 Where the University accepts a prospective student, who has failed to meet the academic conditions as laid down in their offer, it will work with the affected prospective students to ensure they understand the academic rigor of the course and the possible challenges they may face. Where minimum criteria are laid down by a PSRB, the offer may have to be withdrawn and where possible an alternative course offered.

6.23 In the case of international students who are accepted in error and do not meet the minimum requirements as laid down by the UKVI the offer will be withdrawn. Where possible, but only in accordance with UKVI requirements, an alternative course may be offered.

Entry with advanced standing

6.24 The term advanced standing applies to prospective students who are requesting entry into the second or later years of a course from a Foundation Degree, HND or other degree/course or using other prior learning or experience (APL/APEL).

6.25 Prospective students applying for advanced standing will be asked to provide detailed information of their current experience or relevant qualifications which will be forwarded to the course leader for assessment. The course leader will only make an offer if confident the prospective student has studied the pre-requisite course content required for the year of entry.

6.26 Prospective students applying from partner colleges with Advanced Standing Agreements will be made offers (according to the terms of the agreement) providing they are applying for the exact route articulated in the agreement. If the
application is outside of any agreed articulation route it will be considered by a
course tutor for compatibility and relevance in the same way as any other
prospective student applying for advanced standing.

6.27 Prospective students for entry with advanced standing applying for full-time
undergraduate courses will normally need to submit a formal application through
UCAS.

6.28 Current (enrolled) NTU Students applying to transfer courses do not need to apply
through UCAS and should contact their School for further information.

Fraudulent applications

6.29 The University reserves the right to terminate the registration of any student who
has failed to disclose information material to the consideration of his/her
application, or who provides false or misleading information.

6.30 The University has, within the framework of its Admissions Policy, a commitment to
minimising the risk of fraudulent applications to its courses. Prospective students to
full-time undergraduate courses will normally have their qualifications verified by
UCAS and will not normally require independent verification by the University.
However, all prospective students whose qualifications have not been verified by a
third party will be required to evidence their conditions of offer prior to an
unconditional offer being made.

6.31 For direct applications to the University (for postgraduate, professional, research or
part time courses) the Admissions Team or Academic School (or Doctoral School in
the case of research degrees) will undertake its own checks to ensure that results
are genuine, including but not limited to using the on-line verifying services
provided by examining bodies and if necessary contacting the awarding institution.

6.32 Prospective students applying directly to the University who are found to have
included fraudulent claims or documentation (e.g. evidence of qualifications or
grades) or where the University has been unable to authenticate any element of
the application will be presented with the University’s findings in writing. They will
be given an opportunity to respond and provide further information, however, their
application may be withdrawn until further verification can be provided by the
prospective student or a validated third party. Applicants who feel that they may
have been misjudged have the right of appeal under the Appeals Procedure for
applicants.

6.33 Where suspected evidence of fraud is identified, the details will be reported to the
relevant authorities, for example, the UCAS Fraud & Verification Unit, any relevant
professional accrediting body, the UKVI in the case of applications from
international students and/or the Student Loan Company.

Further information and work requests

6.34 On occasion the University may need to contact prospective students to request
further information to help understand the prospective student’s circumstances or
require specific information about the prospective student’s qualifications, skills and
experience to enable a judgement to be made on their eligibility for the course.

6.35 Some courses require prospective students to submit work (usually a written essay
or a portfolio of images). Any courses requiring a work submission will explicitly
state this on the NTU website course profile. The requests for work sent to the
applicant will include explicit submission criteria (word count, size of files, number of images etc.) which will be applied consistently to all applicants.

6.36 All submissions of work will be assessed against agreed assessment criteria and the weighting given to the work submission will be fair and transparent.

6.37 Applicants failing to respond to requests for further work or information by the given deadline will be withdrawn. Requests to reactivate an application will be subject to the availability of places.

Interview conduct

6.38 The University adheres to the Good Practice Statement for Interviews produced by Supporting Professionalism in Admissions (SPA) for all of its courses. A summary of the Best Practice for Interviews is available on the Admissions Staff Handbook SharePoint Site and is reviewed annually against its operation in the previous cycle, the findings of any appeals and updated PSRB guidance.

6.39 Prospective students with access requirements will be contacted by the relevant academic school to ensure these are discussed ahead of any face to face meetings. Academic Schools will work with Student Support Services to ensure that suitably trained staff are sourced to provide support as required by the prospective student.

6.40 Prospective students who feel they are unable to attend an interview are strongly encouraged to contact the academic school to discuss their concerns.

Near misses and alternative offers

6.41 The University will review the results of all prospective students and may on occasion, subject to the availability of places and an assessment of the prospective student's ability to succeed, confirm offers below the publicised entry requirements.

Explanatory note

- For example, following receipt of the A-level results in August the University may take the decision (on a course by course basis) to offer applicants a place at minus 8 UCAS tariff points thus giving preference to applicants who confirmed the University as their first choice over Clearing applicants.

6.42 For some courses applicants who are not expected to achieve, (at application) or fail to achieve (at confirmation) the required entry requirements, an offer for an alternative course may be made (usually a course with lower entry requirements). Details of the alternative course will be communicated by email to the prospective student at the point the alternative offer is made.

Previous study at the University

6.43 Prospective students applying for readmission after being withdrawn by the University, either following the decision of a Board of Examiners (or a College Research Degrees Committee or Progression Board for research students) or under other University policy, will not be readmitted to the same course, nor normally be readmitted to a course in the same School, and in some cases will not be
readmitted to the University. Schools may apply discretion in the cases of students withdrawn under University welfare policies where the University is confident they are suitable for readmission.

6.44 Current students applying for a course transfer (internally or through UCAS) within or between Academic Schools will normally be expected to pass their current/previous course of study.

6.45 Students who have not passed their current/previous NTU course, despite meeting the published entry requirements for the course, may not be re-admitted if they have not demonstrated dedication and commitment to their studies.

Re-marks and re-takes of qualifications

6.46 The University understands that there may be occasions when a prospective student feels the need to appeal the examinations results on which their place is conditional upon. Where the University has already made an admissions decision, in good faith, based on the original mark this decision will stand until official notification of the remark is received.

6.47 For UCAS courses the University will do its utmost to reconsider prospective students with remarked grades if the revised grades are received by the UCAS cut off deadline of 31 August. However, it may not always be able to guarantee entry, especially where student number controls are determined by external regulatory bodies or by resource limits at the University (e.g. access to laboratory or workshop space etc.). After the 31 August the University will review each application for reconsideration in conjunction with the availability of places.

6.48 If a prospective student, finding themselves in this situation is holding a room in the University’s UPP Halls of Residence or other managed properties the room will be released until such time as the official notification of the remark is received (and the place confirmed). Where possible, the University will reinstate the original booking or alternatively support the prospective student to find alternative accommodation.

6.49 Where applicants have sat the same qualification in a previous sitting but have achieved a lower grade the University will normally accept the highest qualification.

Qualification verification

6.50 Students applying directly to NTU courses may be required to produce qualification evidence and must send either their original certificates or copies to the University as evidence of their achieved qualification(s) in advance of being made an unconditional offer of a place on their course of study. The student will not be allowed to enrol fully until the verification process has been completed. Prospective students applying for APL will need to provide copies of their transcripts and modular content of their previous course of study and evidence of relevant work experience if appropriate.

Terms and conditions

6.51 All applicants will be sent at ‘offer acceptance’ (firm and insurance) a link to a PDF copy of the University’s terms and conditions which includes the University’s regulations by which a student will be expected to abide by should they go on to enrol with the University, including but not limited to:
a. The Student Handbook;
b. Academic Regulations;
c. Student Code of Behaviour;
d. Fee Payment Conditions;
e. Equality & Diversity Policy;
f. Complaints Procedure;
g. Computer User Regulations;
h. Intellectual Property Policy for Students;

6.52 Some applicants applying earlier in the cycle may receive the information retrospectively and if any significant changes are made all applicants will be updated.

6.53 In addition to the above you will be expected to abide by course handbooks and codes, rules and regulations of any other relevant organisation or institution (where applicable)

6.54 Applicants applying via UCAS will also be sent the ‘key facts’ (course fee, module information etc.) about their course at ‘offer acceptance’ (firm and insurance). Prospective students are strongly advised to print a copy of this for future reference.

6.55 Applicants have a statutory fourteen days from the date of the offer acceptance communication (email) to cancel their place without incurring any financial penalties. However, under the University’s Fee Payment Conditions students (except those applying or enrolled on online distance learning courses) have up to 21 days from the scheduled course start date (of any given academic year) where no tuition fee will be payable for that year in the event of cancellation. (*prospective students applying or enrolled on online distance learning course should refer to the Fee Payment Conditions for online courses.)

6.56 Applicants can cancel their place by emailing the admissions team at applications@ntu.ac.uk or can download the course cancellation form.

7. Application processing: specific applicant groups

**Care leavers (UCAS prospective students only)**

7.1 Care leavers are defined as prospective students who have been in the care of the Local Authority for a period of 13 weeks or more spanning their 16th birthday. This leads to entitlement to ‘aftercare services’ until the age of 21 or 24 if in full time higher education.

7.2 Prospective students are encouraged to indicate on their UCAS application form if they are care leavers. All applications will be first assessed for academic suitability against the agreed entry criteria for their chosen course. Once an offer is made the University’s Student Support Services will contact the prospective student where necessary for further discussion about any specific support needs.
Disabled prospective students

7.3 The University is committed to developing an inclusive learning environment for all students and seeks to reduce any barriers that might confront a student with a disability seeking to study at NTU.

7.4 Disabled prospective students are encouraged to declare their support needs at application stage. All applications are assessed for academic suitability against the agreed entry criteria for their chosen course.

7.5 Once an offer is made, the University’s Student Support Services will contact the prospective student to provide information about provisions that can be made available and for further discussions about specific support requirements. This is to ensure that any necessary reasonable adjustments are in place for the start of their studies and to ensure a smooth transition into life as a student at the University. This will include arrangements for enrolment, registration and induction.

7.6 Most disabled prospective students will be admitted to a course using the same entry criteria as any other prospective student; however, adjustment to entry criteria may be made where it can be shown that a disabled prospective student will be capable of meeting the course’s learning outcomes. The University offers tailored guidance for disabled applications and this is available in alternative formats from the Disability Support Service Team.

7.7 The admissions procedure for disabled prospective students aims to ensure that:

a. applications indicating support or access requirements are given the consideration they require in an effective and timely way, taking into account the prospective students’ views and using the specialist expertise available within Student Support Services;

b. the University meets all obligations under current Equality legislation;

c. disabled prospective students are made aware that the disability information provided by them will be used as part of the process of determining any particular access and support arrangements that may be required and are given the opportunity to discuss their requirements prior to entry;

d. there is no unnecessary delay in the processing of offers;

e. any information disclosed is handled securely and confidentially whether at the application stage or any other stage of the student life cycle;

f. The University follows the necessary steps to enable the prospective student to make an alternative choice of course or institution if an offer cannot be made for reasons related to their disability.

Minors’ safeguards and support

7.8 The University is committed to safeguarding and promoting the welfare of all students studying at the University, but takes additional steps in relation to those aged under eighteen years of age who are considered children in English law.

7.9 The University requires parental/carer consent before admitting any student who will be under the age of eighteen at the point of enrolment. These prospective students are therefore identified as part of the application process and both the prospective student and the parent or carer are asked to sign and return a confirmation or consent form. However, if a prospective student is living
independently from their parents and can evidence their independent living status, the University will not require parental consent.

7.10 The content of some modules and courses at university can sometimes include legitimate themes, discussions or viewing of films rated 18, which could be considered of an adult nature. Where students under the age of eighteen are enrolled on a course of study, Course leaders will be made aware of their presence and asked to adapt their approach as appropriate.

7.11 Students under the age of eighteen whose parent/carer is not based in the UK are required to provide details of a UK based guardian who can act as a contact in the event of an emergency. The UK based guardian can be a nominated friend or relative living in the UK, or a guardian appointed through a guardianship organisation who offer such services.

7.12 Schools are responsible for making the student’s academic tutor and course leader aware of minors enrolled on their courses and Course Leaders are responsible for amending content appropriately. The School Administration Managers have access to an Under 18 report on the COGNOS dashboard to help inform this process.

7.13 The details of student’s parent/guardian contact details for students under the age of 18 at the start of each academic year will be indexed on the University’s Student Record system.

7.14 It is the responsibility of the Dean to ensure that prospective students whose parent or carers are non-UK based have an appropriate UK based guardian appointed from induction. Prospective students without an appropriate guardian may be withdrawn from their studies until the situation can be resolved.

7.15 Further information on the University’s Safeguarding Vulnerable Groups Policy can be found on the NTU website.

**Mitigating circumstances**

7.16 The University recognises that a prospective student’s pending or achieved qualifications may be affected circumstances beyond their control.

7.17 Whilst the University appreciates that interruptions to a student’s education, such as staff shortages, teacher absence and assessment/curriculum irregularities may affect a student’s performance, it cannot make individual adjustments to course entry requirements or results. Therefore, the University will not accept requests for mitigating circumstance relating to ‘teaching’ or ‘assessment’ irregularities. Students should ensure they make use of the special consideration processes offered by the various Examination Boards, although it should be noted not all boards will accept mitigations of this type.

7.18 The University also understands that applicants can experience significant interruptions to their studies because of health issues (physical or mental) and other personal circumstances. However, the University cannot make individual adjustments to entry requirements or results to compensate students. These circumstances should have already been considered in a prior mitigation processes:

a. For chronic (long-term) medical conditions or disabilities (including learning difficulties), the University would normally expect that reasonable adjustments would have already been put in place to support students through their studies.
b. For short – medium term or one off issues, the University would expect that these types of extenuating or mitigating circumstances are reported via the special consideration processes offered by the various Examination Board(s).

7.19 For a small number of students who do not meet their offer but provide strong evidence of exceptional circumstances, the University may be able to offer a place providing there is clear evidence that the student is capable of achieving the intended learning outcomes of the course and/or competence in standards required for the award.

7.20 The University will not take into account mitigating circumstances which are brought to its attention after a decision has already been made.

7.21 All requests for mitigating circumstances must be submitted by the applicant (or with their full knowledge) on the University’s Mitigating Circumstances Notification Form (which for applicants in further education must be countersigned by the School/College).

7.22 For consistency, requests for consideration of mitigating circumstances for taught courses are dealt with by the University’s Mitigating Circumstances Panel, made up of the Director of Marketing and Communications, Admissions Manager, and representation from the School and/or Student Support Services.

7.23 By submitting a request for mitigating circumstances, applicants are consenting to their information being shared with members of the Mitigating Circumstance Panel. Applicants should be assured that this information is kept securely and will in no way reflect negatively on them.

7.24 For applicants with circumstances of a longer-term nature, which the student has not declared on their application form and which the panel believes may affect a student's studies whilst at University, the details will be shared with the University’s Student Support Services should the student or the University deem they require on-going support.

7.25 All correspondence regarding requests for mitigating circumstances will be directly with the applicant.

7.26 Where possible students will be informed of the outcome of their request for mitigating circumstances before Confirmation (for UCAS students the main Confirmation period is the three weeks leading up to A-level results day). However, decisions prior to receiving achieved results may not always be possible and students should check their UCAS Track or Applicant Portal for updates.

7.27 The University will make best efforts to reach a decision quickly following the receipt of the results. However, for some more complex cases the University may require further information or the panel may need to convene to discuss the student’s case in more detail.

7.28 The University will not normally confirm applicants (regardless of the circumstances) who achieve below Clearing or Confirmation points.

7.29 The University will not normally accept requests for mitigating circumstances from applicants applying through Clearing regardless of the circumstances.

7.30 Students applying for mitigating circumstances to be taken into account who either meet their conditions of offer, or are accepted, should make themselves aware of the University’s ‘Fitness to Study Policy and Procedure’ and ‘Crisis Intervention Policy – Students at Risk or Causing Concern’.
Scholarships

7.31 The University provides a limited number of Scholarship to new students and these are advertised via the NTU website and also where applicable information is sent to targeted groups of applicants (e.g. by school, residency, level of course etc.). Further information about the University’s Scholarships can be found on the University website.

7.32 Applicants will be informed in writing, of the outcome of any scholarship application and must accept the offer by the given deadline. Applicants can apply for more than one scholarship scheme, however, they would not normally be allowed to accept more than one offer.

Transition

7.33 The University recognises that the transition to University, which may or may not involve a move away from a student’s usual support networks, can be quite challenging for some students.

7.34 The targeted communications plans will keep prospective students informed of the progress of their application and with details of any relevant pre-enrolment checks they may need to complete before arriving at University.

7.35 Schools and Marketing teams will contact all new students who have accepted a place to provide them with the details for enrolment, registration, and induction. The Doctoral School will undertake this for research students. This includes providing further information about their course team, pre-reading and equipment lists, ‘Starting at NTU’ website, timetable information and Welcome Week activities. Prospective students starting at key non-standard start dates (e.g. January) will also be contacted with relevant information.

7.36 The University organises a series of transition events designed to help new students settle into the University environment. Further information about activities can be found on the Starting at NTU and International Students websites.

8. Application processing: international student admission

Academic Technology Approval Scheme

8.1 The Academic Technology Approval Scheme (ATAS) requires all international students subject to existing UK immigration permissions, who are applying to study for a postgraduate qualification in certain sensitive subjects, knowledge of which could be used in programmes to develop weapons of mass destruction (WMDs) or their means of delivery, to apply for an Academic Technology Approval Scheme (ATAS) certificate before they can study in the UK.

8.2 The requirement for an ATAS certificate applies to all students whose nationality is outside the European Economic Area (EEA) and Switzerland, irrespective of country of residence at the point of application.

8.3 A letter to support an application for an Academic Technology Approval Scheme (ATAS) certificate will be issued to a prospective student on request or at the point of application. The University requires a copy of the certificate on record before the issue of a Confirmation of Acceptance for Studies (CAS); therefore, the ATAS certificate will be requested as a condition of offer.
Admission requirements for international students

8.4 In addition to a completed application form, international prospective students will be required to submit the following documentation:

a. All relevant academic transcripts and certificates from previous studies (original copies and certified English translations where appropriate);

b. English language test results (if appropriate);

c. A reference/letter of recommendation (where a reference is required it is the responsibility of the prospective student to ensure this is sent to the University);

d. Personal statement or supporting information;

e. A copy of their current passport and any in date immigration documents (or past immigration documents showing previous UK study);

f. International prospective students will be required to pay an advanced payment of £3000 or the full fee (if less than £3000) unless they provide an official sponsorship letter for the course fees.

Assessment of international applications

8.5 International applications are assessed using the same entry criteria as all other applications in addition to confirmation that English language requirements are met. Some applications may require further consideration through other assessment methods such as a telephone interview, an in-country interview, submission of written work, completion of an admissions test or alternates. Where this is the case, full details will be provided to the prospective student.

8.6 Prospective students classed as overseas for fee purposes are advised to check their immigration or visa status before applying.

Educational agents

8.7 The University works with a number of Educational Agents located in-country who are contracted by the University to recruit students for courses of study. The University is committed to working with agents who are well-respected, competent and knowledgeable (about the UK education system) and who have a good reputation for providing high quality students.

8.8 Educational agents are recruited according to the agreed University regulations and policy. The operation and performance of agents is regularly reviewed and agents are given explicit information about the University’s expectations of them. Agents that do not meet the expected standards, as outlined in the policy, will have their contracts terminated.

8.9 For international prospective students who apply through an Agent, who has formal ties to the University, it will be assumed the prospective student’s consent has been given to send all communications to both the prospective student and the nominated Agent.
Explanatory note

- Further information about the policy of recruitment and monitoring of Educational Agents is available on request from the University’s International Development Office.

English Language entry requirements

8.10 Prospective students whose first language is not English need to provide evidence of English language proficiency. The University will normally make an assessment of a prospective student’s first language based on the information provided on the application form, including (but not limited to) country of origin, country of permanent residency and qualifications.

8.11 The standard University requirement for taught courses is IELTS 6.5 with a minimum of 5.5 in each element (or equivalent). For all research degrees, the standard University requirement is IELTS 6.5 with a minimum of 6.0 in each element (or equivalent). A full list of course requirements and agreed exceptions can be found on the international section of the website.

8.12 The University reserves the right to change the English Language Requirements depending on the performance of students, due to the access or availability of test centres and due to regulatory changes.

In-country offer making

8.13 The University’s IDO staff, as well as dedicated academics, are mandated to recruit students whilst working away from the University. The recruitment may take place at, but not be limited to, organised Recruitment Fairs, Educational Agent’s Offices or through activity in conjunction with the British Council or other interested parties.

8.14 An offer made remotely from the University in the applicant’s country of residency is usually referred to as an ‘in-country offer’.

8.15 An in-country offer allows the applicant to receive an immediate offer and the application processing is fast tracked by the Admissions Team. The applicant’s details are provided to the Admissions Team who send a formal offer email and ensure that copies of the required documentation (including UKVI documents) are received and indexed on the University Admissions System.

8.16 All in country offers are subject to the same regulations as standard offer making and are checked by the Admissions Team for consistency.

8.17 Training, along with detailed documentation, is provided by the IDO to all IDO staff and academics who use this process in-country.

International qualification equivalences

8.18 Advice and information on the comparability of international qualifications is compiled from a range of sources, including National Academic Recognition Information Centre (NARIC), Educational Agents, British Council and insight from country visits. The agreed equivalences are stored centrally and are accessible for the Admissions Team and University’s IDO to access for consistent information, advice and guidance.
8.19 Applications which are referred to the school for a decision include information from this central source to help academic staff make informed and consistent decisions.

**Visa and Tier 4 information**

8.20 The University complies with the Home Office UK Visa & Immigration (UKVI) [Tier 4 visa requirements](#) for international students.

8.21 The University is obliged to check that all international prospective students applying to the University are eligible to study on their chosen course according to the conditions of their immigration status and/or visa.

8.22 International students wishing to apply for a Tier 4 visa will be issued with a Confirmation of Acceptance for Studies (CAS) once they have completed the admissions process. Only prospective students, who have met all the conditions of their offer, including making an advance payment, can be issued with a CAS.

8.23 The University is required to report to the UKVI when a Tier 4 student fails to enrol on their course within the enrolment period. The University is also required to maintain up-to-date contact details for Tier 4 students and hold copies of all relevant passport and visa documents. Immigration documents will be collected as part of the enrolment process at the start of the course. Documents must be presented in their original format within the enrolment period. Students who fail to provide the required documents within the timescales specified will be reported to the UKVI.

**9. Application processing: self-declared criminal convictions and Disclosure and Barring service and other checks**

**Criminal convictions**

9.1 Whilst operating an admissions system committed to equality of opportunity, the University must consider the welfare of all students and staff and any possible risk to them, when considering allowing prospective students with known convictions to study on University premises.

9.2 All applications are initially assessed for academic suitability against agreed admission criteria for their chosen course. If a prospective student has declared a criminal conviction on their application form, the University will contact the prospective student for further information about their convictions when an offer is being considered. No further action will be taken for applicants who are not academically suitable for admission.

9.3 If anonymous information regarding applicants and criminal convictions is received this is treated with caution and will only be followed up if there are reasonable grounds to do so.

9.4 Applicants who are found to have intentionally omitted information about a criminal conviction from their application will be dealt with in line with our fraudulent applications process (see section 6.29).

9.5 Information regarding convictions is requested so that an application can be considered fully and will not be used for any other purpose. The information provided will be held confidentially, however, where a prospective student applies for a course that may involve placements working with children/vulnerable adults,
or the course is governed by an external accreditation body such as the Health and Care Professional Council (HCPC), the information prospective students provide may be shared with the relevant placement provider prior to an offer being made. Students applying for Social Work courses will be considered by the School of Social Sciences Suitability Panel chaired by the Dean of School.

9.6 Prospective students may be withdrawn if they fail to respond to requests for further information or where the University is unable to obtain information from nominated references through no fault of its own.

9.7 On receipt of further information (and providing the conviction is not spent) the application will be reviewed by a designated admissions team leader who will determine whether it needs to be referred to the Serious Criminal Conviction Panel. For minor ‘relevant’ offences the decisions may be made by the designated admissions team leader or admissions manager.

9.8 Prospective students with serious criminal convictions, usually defined by a custodial sentence (suspended or otherwise), will be referred to the Serious Criminal Conviction Panel (SCCP). The SCCP is made up of the Head of Marketing and External Reputation, Admissions Manager, Dean of the admitting School, Head of Student Support Services, Student Community and Liaison Manager (who forms part of the Accommodation department) and the Pro-Vice Chancellor for Student Affairs.

9.9 For students applying to NTU under the Admissions Policy but attending at another organisation (e.g. Confetti Institute of Media Technologies) a senior member of staff from the relevant organisation will be consulted as part of any risk assessment process.

9.10 The Pro-Vice Chancellor for Student Affairs, as the Vice Chancellor’s nominated representative, is responsible for chairing the panel and the final decisions rests with the Chair.

9.11 The University strongly believes that students entering Higher Education have a responsibility to demonstrate a change to their previous behaviours under their own recognisance. Therefore, the University reserves the right to decline applicants with relevant convictions who are still serving their sentence, who are possibly subject to probation or licence conditions or the end of their supervised period is close to their course start date.

9.12 Students wishing to appeal or complain an admissions decision based on a criminal conviction risk assessment should do so through the appeals procedure outlined below.

**Disclosure and Barring Service Checks**

9.13 For some courses, usually in the areas of health, teaching and social work, prospective students will be required to undertake an Enhanced Disclosure and Barring Service (DBS) check at confirmation but before commencement on their course. For courses requiring an Enhanced DBS check, prospective students will be required to declare all convictions including convictions, cautions, admonitions, reprimands, final warnings, bind over orders or similar, including those classified as ‘spent’ under the Rehabilitation of Offenders Act 1974 that would display on an enhanced disclosure.
9.14 Applicants who do not reside in the UK will also be requested to provide police/criminal record checks from the country in which the applicant lives.

9.15 The University will make all reasonable efforts to ensure that prospective students for courses have completed the DBS process before starting their course. Where it is unable to do so, for example, due to delays with DBS processing, a late offer or the late receipt of results, the prospective student may be allowed to commence their studies but will only be allowed to ‘conditionally enrol’ until the clearance has been received.

9.16 Students who are only conditionally enrolled will be checked where appropriate against the Barred List (on-line register of people barred from working with children or vulnerable adults) before the start of their course. Once on placement, relevant students will be subject to strict conditions of supervision by the placement provider.

9.17 Students who fail to complete the actions required to submit the form to the Government’s Disclosure and Barring Service will be automatically withdrawn under the University’s Enrolment Conditions (terms and conditions 6.5) normally two weeks after the course start date (excluding Welcome Week).

9.18 Prospective students who are cleared following an enhanced DBS check will be allowed to complete the enrolment process on their chosen course providing they have met all other outstanding conditions of offer.

9.19 For prospective students whose DBS certificate contains content not previously reviewed through the ‘self-declared’ criminal convictions process (as above), the prospective student will be processed accordingly and may be referred to the Serious Criminal Conviction Panel for a suitability decision.

9.20 Prospective students who fail to declare relevant convictions, at the earliest opportunity, may be withdrawn from their course or be unable to qualify for their course of study.

9.21 Any student who gains a conviction after receiving an offer or after enrolment is required to bring this to the Universities attention.

9.22 The University uses an external company, GB Group Ltd (On-line Disclosures), to undertake all its DBS checks.

**Health and fitness and other fit to practice assessments**

9.23 For certain professional or vocational qualifications, usually in the areas of education, health and social care, the University requires prospective students to complete a health declaration and or a medical screening questionnaire. In some cases, prospective students will be referred to an Occupational Health Unit to determine the suitability for their chosen course.

9.24 The requirement for a health and fitness assessment will be clearly outlined on the course profiles section of the NTU website.

9.25 For teaching courses students will be required to undertake checks as required by the National College for Teaching and Leadership (NCTL), including but not limited to, Prohibition Order and Childcare Disqualification checks.

9.26 Students who fail to complete the actions required within two weeks (excluding Welcome Week) will be automatically withdrawn under the University’s terms and conditions (6.5).
9.27 All information will be treated in the strictest confidence.

**Suitability Panel for Prospective Social Work Students**

9.28 The University adheres to the guidelines and good practice of the HCPC and as such the School of Social Science operates a Suitability Panel for prospective social work students. Prospective students for Social Work courses with declared criminal convictions will be considered by the panel for their suitability for both the course and profession before being made an offer.

9.29 The Suitability Panel will also assess the professional suitability of prospective students with serious health issues or local social care service users as declared on the suitability declaration form completed prior to interview.

9.30 Decisions of the Social Work Suitability Panel, where relevant, will need to be ratified by the Chair of the Serious Criminal Conviction Panel.

10. Application processing: fees and funding

**Fee assessment**

10.1 It is the responsibility of individual Higher Education Institutions to assess the fee status of potential students. In most cases, the University will be able to determine a prospective students’ fee status on the basis of information provided on their application form. However, where this is not possible, a formal fee assessment process is carried out to determine their fee in line with the ‘The Education (Fees and Awards) (England) Regulations 2007’ and ‘The Education (Fees and Awards) (England) Regulations 2007 (Amendments) Regulations 2011’.

10.2 Prospective students who fail to provide the necessary information to allow a full fee assessment will be defaulted to overseas fees until such time they provide the necessary evidence. If the prospective student fully enrols they will be deemed to have accepted the default assessment and changes will be at the discretion of the Dean.

10.3 Appeals against fee status must be made within three months of the fee assessment having been carried out or at the point of enrolment, whichever comes first.

10.4 An appeal will not be processed retrospectively after enrolment on a course.

10.5 Students wishing to know their fee status before making an application can do so by reviewing the criteria shown on the UK Council for International Student Affairs (UKCISA) website.

10.6 The University reserves the right to amend a fee status if further information comes to light and changes will take with immediate effect.

10.7 The University will assess a prospective student’s fee rate as of the first date of the first academic year. Further information about the definition of the ‘first date of the first academic year’ can be found on the UKCISA website.

10.8 The University will only reassess a student’s fee rate mid-course if they meet the criteria as outlined in the regulations. Further information can be found on the UKCISA website.
11. Appeals

Expectations

11.1 The University expects that all interactions between prospective students, students, supporters and staff will be conducted with mutual understanding and respect. Any unacceptable behaviour will not be tolerated and may prejudice an application or appeal. In exceptional cases, where the seriousness of the behaviour has breached accepted norms, further action may be taken including, but not limited to, withdrawing an offer and cancelling an accommodation application.

11.2 For UCAS or UTT prospective students, where inappropriate behaviour leads to the withdrawal of any offer, the University will report its actions to UCAS.

11.3 In exceptional circumstances, the University may feel morally or legally obliged to report its findings to other authorities.

11.4 The University is committed to the provision of an admissions service to all prospective students which is fair, efficient and transparent. However the University recognises that there may be instances where a prospective student feels aggrieved with the University’s admissions decisions or processes and wishes to bring their concerns to our attention either formally or informally.

Applicant Appeals Procedure

11.5 This Procedure is for the use by applicants applying for admission to the University (where the admissions procedure is the sole responsibility of the University) and should not be confused with the complaints procedure for students which is not open to applicants.

11.6 The University, where possible and whilst being sensitive to the concerns of the prospective student, will aim to deal with issues informally. Many issues can be dealt with appropriately in this manner and the University’s appeals procedure has been designed with this in mind. This is not to say they will be treated with less importance and will still form an important part of the University’s regular review of its service delivery.

11.7 Any Appeal will be handled in isolation from the application and will not prejudice current or future applications.

11.8 The University will only normally accept an Appeal directly from the prospective student, unless a third party has the explicit consent to act on their behalf.

11.9 Prospective students who feel that they have grounds for Appeal should raise the matter within 10 working days’ of the last action/action/correspondence or admission decision of the University.

11.10 For the purposes of this procedure an Appeal is defined as a request from an unsuccessful prospective student to review the outcome of an admissions decision and should only be submitted on the following grounds: -

   a. they can demonstrate/evidence that the University has deviated from its own policy, procedures and practice; or

   b. further information, which was not available at the time of application, is presented to the University; or
c. there is a perception or indication that the prospective student has been treated differently to another applicant in a similar situation.

11.11 The high level of competition for some courses means that it is unavoidable that the University will disappoint some prospective students with a selection decision. It should be noted that prospective students have no right of appeal against decisions that are based on the academic or professional judgement of the University about suitability for admission. For example, academic judgement may be used to determine the suitability of prior learning (accredited or otherwise) for entry in lieu of formal qualifications, or an assessment of the suitability of subject knowledge from less traditional qualifications.

**Procedure for Submitting an Appeal**

11.12 **Stage 1:** request for feedback or clarification: Before submitting an Appeal a prospective student should normally contact the Admissions Office (or contact the Doctoral School for research degrees), by telephone or in writing, to request feedback or to discuss their concerns.

**Stage 2:** Appeal: Before submitting an Appeal the prospective student should ensure that they have read the grounds outlined above. An Appeal should be submitted in writing to:

a. For taught courses to: Head of Admissions, Admissions, Nottingham Trent University, 50 Shakespeare Street, Nottingham, NG1 4FQ.

b. For research degrees to: Doctoral School Administration Manager, Nottingham Trent University, 50 Shakespeare Street, Nottingham, NG1 4FQ.

**Stage 3:** Where the prospective student remains dissatisfied with the outcome at stage 2, the prospective student may request a review of the Stage 2 decision. The prospective student must provide clear reasons/evidence for requesting a review (for example, evidencing that information had not been in taken into account at stage 2). The outcome of Stage 3 will be considered final and therefore the prospective student is unable to take the matter further with the University. A review can be requested in writing to:

a. For taught courses to: Director of Marketing and Communications, Nottingham Trent University, 50 Shakespeare Street, Nottingham, NG1 4FQ

b. For research degrees to: Head of Doctoral School, Nottingham Trent University, 50 Shakespeare Street, Nottingham, NG1 4FQ

11.13 As a minimum guideline an Appeal (Stage 2) should include the following information:

a. Prospective student name and any relevant application reference numbers provided either by the University or third parties such as UCAS;

b. Contact details;

c. Details of the grounds for the Appeal;

d. Any further information that the prospective student feels relevant to their case.

11.14 An acknowledgement of an Appeal (Stage 2) or Review of an Appeal (Stage 3) will normally be made within five working days. The Admissions Manager or Doctoral School Professional Support Team Leader, or their nominee, will
investigate in conjunction with any relevant School(s) or Department(s) and the outcome will be communicated within 10 working days from acknowledgement. If for any reason these timescales for response cannot be met, the prospective student will be updated of expected timescales within the 10 working days from acknowledgement.

11.15 Where the Appeal relates to a selection decision, and is upheld, the University cannot guarantee admissions to the academic year initially requested, however where possible an alternative point of entry may be offered.

12. Monitoring and governance

12.1 The University keeps its admissions policy and procedures under regular review and monitoring.

Requirements

12.2 On behalf of Academic Board, the Academic Standards and Quality Committee (ASQC) will monitor the policy and procedures set out in this section and ensure that they continue to support the strategic objectives of the University, and remain current and valid in the light of changing circumstances. The University Research Degrees Committee (URDC) will undertake the same actions on behalf of Academic Board for research degrees.

12.3 It is the Admissions Manager’s responsibility to ensure appropriate governance of the Admissions Policy working in conjunction with key stakeholders, including but not limited to, the Doctoral School Professional Support Team Leader, School Quality Managers, School Administration Managers and the Director of International Recruitment.

12.4 The Policy is reviewed on an annual cycle and approved by ASQC each September for operation in the application cycle immediately following.

12.5 The Policy is reviewed in light of its operation in the current cycle (including applied learning from complaints or issues which may have arisen), any new or upcoming PSRB requirements or good practice statements by bodies such as SPA and the QAA.

12.6 This policy is operational for a full academic cycle starting in the October of each year.

12.7 This Policy is operated in conjunction with the following policies and good practice guidelines, including:
   a. QH Section 11: Research Degrees.
   b. QH Supplement 13A – Admissions: taught course supplement.
   c. QH Supplement 13B – Operational of admissions policy and further guidance on admission to research degrees.
   d. QH Supplement 13C – Further Education application process.
   e. University Terms and Conditions - https://www4.ntu.ac.uk/admissions/policies/terms-conditions/index.html
g. NTU’s Good Practice for Interviews & other pre-admission activity (Admissions Staff Handbook).

h. NTU’s Good Practice for Admissions Tutors (Admissions Staff Handbook).

i. **OFFA Access Agreement.**

j. NTU’s Selection Policy for Agents.
